

11

Click-DRAG to draw curves. Click the Pen tool to end object.
Use the Direct-selection tool to edit the curves.

Observe how the length and angle of each direction line echoes the gestures of the curves.

Note: If you're having trouble, use the Layers palette to view Bézier Lines

12

To create Hinged Curves use the Pen tool to click-DRAG the first curve, then without releasing the mouse button hold the Option key (Mac) or Alt key (Win) to pull the curve handle in the new direction. Release the mouse button and click-DRAG the next curve point.

IMPORTANT:

To close an object with a hinged curve, hold down the Option (Mac) or Alt (Win) key while you click-DRAG on the first point
